The above mentioned AS Engineering and Consulting (ASEC) representative, visited the Carodel Farms site to conduct quality control inspection and testing services. Visual observation techniques were employed to ensure compliance with project drawing/specifications, applicable codes, and materials submittals. The following observations were made on-site:

The following observations were recorded during the shift:

- Our representative monitored the drilling of rock and verified the accuracy of the top of rock and termination depths.
- The resulting volumes were calculated and are presented in a separate report, which is dated in conjunction with the blast day for reference.

We appreciate the opportunity to be of service to you on this project. If you have any questions regarding this report, please feel free to contact us. We will be more than happy to discuss it with you.
