The site was visited by the undersigned AS Engineering and Consulting (ASEC) representative for the purpose of providing quality control inspection and testing services. Visual observation techniques were employed to assure compliance with project drawings/specifications, applicable codes, and materials submittals. The following observations were made on site today:

Lots #36,37,38,39, & 40 were being readied for visual inspection upon arrival. All reinforcing steel placed was found to meet job specifications for size, quantity, and spacing. Dynamic Cone Penetrometer (DCP) tests were conducted for prepared footings. All prepared foundations visually inspected were found to achieve a soil bearing pressure of 2,500 psf. Please see the attached data tables.
